

ABflo® 488 Rabbit anti-human IgG FC (YTE mutation) Specific mAb

Catalog NO.: A28931

Basic Information

Observed MW

Calculated MW

Category

Monoclonal Antibodies

Applications

ELISA

Cross-Reactivity

Human

Conjugation

ABflo® 488. Ex:491nm. Em:516nm.

Clone number

6H2

Background

Related studies have shown that M252Y/S254T/T256E (YTE) mutations in the Fc region of IgG antibodies can prolong the half-life of therapeutic antibodies, optimize the pharmacokinetic characteristics, and reduce the frequency of administration. We developed Rabbit Anti-human IgG-FC (YTE mutation) Specific Monoclonal Antibody that effectively captures and stably binds to IgG Fc segment YTE mutants. The YTE mutant for therapeutic IgG has important application value in pharmacodynamic/pharmacokinetic studies and detection technology.

Recommended Dilutions

ELISA

Recommended starting concentration is 1 µg/mL.

Please optimize the concentration based on your specific assay requirements.

Immunogen Information

Gene ID

3500/ 3501/ 3502/ 3503

Swiss Prot

P01857/P01859/P01860/P01861

Immunogen

This information is considered to be commercially sensitive.
